## How Can You Help our PTO?

We are making plans for the next school year and are reaching out to parents for support. We have several activities and programs that we put on for the kids and/or teachers throughout the year. We are looking for committee leads or to make a list of steady volunteers we can reach out to.

The commitment per event is usually minimal – just a few hours (depending on activity) per year. There are some larger events that require more time and support such as the ski program and the garden club. If you are hesitant but want to try, we will help/guide you through.

Please take a moment to review the list below and let us know if you want to lead a committee, co-lead a committee, want to learn more or wish be on the list of people we can contact to help in general or with a specific event. You do not have to be part of the PTO or attend meetings to get involved, everyone is welcome!
